Tech Growth Investing is volatile and prone to large swings. This type of investing may not be appropriate for every investor. Please consult with a licensed financial advisor.

All stops assume closing price - marked with (close). If price closes below the stop listed, the next day we sell. If the stop has the phrase (hard) next to it, then the moment the stop price is breached intraday, we sell at the market.

We are not financial advisors. We do not make personalized recommendations. We simply show you what we are doing with our specialize tech fund (I/O Fund). Tech stocks are volatile and come with hightened risk. Our time horizon is +5 years, which is crucial when investing in tech micro trends. We practice smart posiiton sizing (we start with 1% - 2% of portfolio). We also practice building positions into strengths more times than not.

"*Long-Term*" stocks are meant to be held for a minimum of 3-5 years. However, if the story or fundamentals materially shift, we will sell these positions. "*Momentum*" stocks are for Advanced members only. they are designed to capture momentum and will be held between 3 months - 1 years. These are higher risk, held at low allocations and have stops on them.

All buys and sells are actual moves that we made in real time. Our activity is based on our research. All buys and sells will be rounded to the nearest 0.0 decimal.
